

If I were Putin I would not be worried about NATO or Ukraine eroding his political base.

The ET “display events” that started during world war 2 and terminated in the collapse of the Soviet Union on **December 25th 1991** are a clear and present danger to totalitarian state. The Ets use of display events was a work around to Soviet abuse of human “Free Will”. The old soviet union knew that the ETs were displeased with their weapons tests and totalitarian state built on secrecy, repression and lies. Their form of government could never be invited into the space brotherhood of star systems. Divine law hold that “free will and choice are sacrosanct”. It was the very large wave of UFO sightings between 1989 to 1991 that broke the back of Soviet ideological and censorship system. This cycle of UFO sightings put the nail in the coffin and force Gorbachev to adopt “Glasnost” (openness) and “Perestroika” (restructuring).

Back during the previous Soviet wave of UFO sighting between the late 1960s and late 1980s, ET Display events had forced Leonid Brezhnev to cooperate with the Americans and other nations and in the creation of the international space station that we have today. Not only this, it forced both America and Russia into nuclear treaties. The current mass ET display events are having the same physiological impact on Asian totalitarian societies of today. These ET display events are a clear and present danger to the Chinese and North Korea states. Sooner or later their militarists approach to government will break down. When mass UFO sightings of fleets over their territories can no longer be denied, their people will demand and win their freedoms.

Nudge Squidfish **11-20-2022**

When immunity is granted for political assassination it just “encourages bad leaders” to defy international laws and norms of conduct. Do we really want a world where nations assassinate each others leaders and journalists? Twitter nudge squidfish **11-18-2022**

As above; So Below. So below; as above.

Time dissolve truth over the centuries. What starts out as an “absolute truth”, held in common consent by a civilization, begins to morphs into “hear say” after a few thousand years. Add a few more thousand years and “hear say” morphs into “legend”. Finally the civilization past into the black hole of time; and a new and better a civilization takes it place, a new common consent is formed. Thus the process repeats itself and a new and better “absolute truth” replaces the old. When I see the UFOs change their shape and color they remind me of this process. That being said, I must report that a member of the W56 (See friendship case-Italy) has made contact with my daughter and I. I don't know his name so I refer to him as “Hank”. He informed me that he'll be working to help me achieve certain goals this next year. Also, I plan to release privately, a special briefing

concerning ET groups working out of Health Ohio. Please note that all the information I share is "Public Domain". If researchers want to make a buck off my information I give them a blank check to do so. Unfortunately, I do not, like most other contactees in my situation, share everything I know. If I am asked by the "powers" that be to withhold certain knowledge I do so. My hope is that others will be able to compare their experiences with mine. Lately, I've been given the green light to share information. This was not the case in the past. I'm not sure what's going on with the Ets. So I trust in Allah, but, I tie up my camel so to speak!
